

Concrete products and services

The cement shortages of 2007 are behind us, and demand is currently down. However, the federal stimulus package is projected to increase demand for concrete and related products (...)

The Acoustic Concrete Tester (ACT) from **Inspection Instruments, Inc.** (www.inspectioninstruments.net) evaluates concrete bridge decks, pavements, retaining walls, slabs, tunnel liners, silos,

footings, and more. It examines if a concrete element is built to the specified thickness and aids in reassuring that it is free of flaws (delaminations, voids, spalling, and honeycombing).
